### Research interests

Data Depth Statistics, Computational Statistics, Machine Learning.

### Awards and Achievements

- 2018 Awarded the *Kishore Vaigyanik Protsahan Yojana* (KVPY) scholarship, with rank 649 (SA).
- 2022 Scored 338/340 in the GRE General Test.

### Projects

- August 2023 **Data Depth Statistics (MS Thesis)**  
– present *Supervisor:* Dr. Anirvan Chakraborty
- Studying the role of statistical depth functions in exploratory data analysis, multivariate inference, classification, outlier detection, regression, etc.
- May 2023 **Combining in-host and inter-host viral infection dynamics**  
– July 2023 *Supervisor:* Prof. James Watmough, University of New Brunswick
- Studied existing agent-based models for the spread of viral infections in a population, as well as ODE-based models for the dynamics of viral infections within a host. Developed a model which operates on both scales, generated and analysed simulation data. Attended the Annual Meeting of the Canadian Society of Applied and Industrial Mathematics (CAIMS 2023).

- August 2022 **Multi-Task Learning in Natural Language Processing**  
 – April 2023 *Supervisor:* Dr. Kripabandhu Ghosh, IISER Kolkata
- Studied techniques for identifying, quantifying, and neutralizing bias in word embeddings, in the context of Natural Language Processing (NLP). Worked on adapting a Multi-Task Learning (MTL) model for this task.
- July 2022 **The Poincaré Theorem for Fundamental Polygons**  
*Supervisor:* Dr. Somnath Basu, IISER Kolkata
- Studied topics in algebraic topology. Explored tilings of the hyperbolic plane as covering spaces of genus 2 and above surfaces, and how this allows such manifolds to be realized as surfaces of constant negative curvature.
- July 2021 **The Stone-Weierstrass Theorem**  
*Supervisor:* Dr. Somnath Basu, IISER Kolkata
- Studied topics in introductory group theory, analysis, and topology. Presented a generously illustrated proof of the Stone-Weierstrass theorem ([notes](#), [presentation](#)).
- April 2020 **Age stratified SIQR model for the COVID-19 pandemic**  
*Supervisor:* Prof. Ranjit Kumar Upadhyay, IIT Dhanbad
- Studied the basic SIQR compartmental model in epidemiology, in the context of the emerging COVID-19 pandemic. Modified this model by subdividing each compartment into age groups, with varying degrees of interaction amongst each other. Applied this model (using numerical simulations in python) to understand trends in infection rates/mortality in countries with different age structures in their population. ([paper](#))
